Claude	https://claude.ai/login?returnTo=%2F%3F	Conversational artificial intelligence developed by Anthropic.
Gemini	https://gemini.google.com/	Conversational artificial intelligence developed by Google.
Llama	https://www.llama.com/	Conversational AI developed by Meta
Manus	https://manus.im/	Manus is an autonomous artificial intelligence tool developed to support the implementation of complex ideas, independently performing more complex tasks in several areas, such as report writing, data analysis, content generation, and other tasks.
Perplexity	https://www.perplexity.ai/	Artificial intelligence that answers questions and provides information based on training data. The focus of the answers can be changed to include only scientific sources.
Data extraction tools		
AskYourPDF	https://askyourpdf.com/	Allows users to ask questions about the content of PDF documents.
ChatPDF	https://www.chatpdf.com/	It allows users to chat with PDF documents to extract information.
Coral.AI	https://www.getcoralai.com/	It allows users to chat with videos and multiple other text documents simultaneously.

SciSpace	https://scispace.com/	It helps in understanding and organizing scientific literature.
DocAnalyzer	https://docanalyzer.ai/	It allows users to upload multiple documents in different formats (PDF, DOCX, MD, ODT, HTML, EPUB, RTF, and TXT) and engage in chat-based interactions.
Research assistants and research management tools		
Connected Papers	https://www.connectedpapers.com/	It helps researchers find and discover documents relevant to their work.
Elicit	https://elicit.com/	It helps in literature review and research synthesis.
Scholarcy	https://www.scholarcy.com/	AI-based article summary.
Transcription and note-taking		
Notebook LM	https://notebooklm.google/	It helps with note-taking and organization.
Visualization		
Adobe Firefly	https://firefly.adobe.com/	A platform for creating images and videos from text.
AutoDraw	https://autodraw.com/	AutoDraw is an AI-based tool that combines machine learning and artistic input to help users quickly create drawings and illustrations.
Bing Image Creator	https://www.bing.com/images/	AI-based text-to-video tool.
Canva	https://www.canva.com/	Graphic design tool with AI-powered features.
Dall-E	https://openai.com/index/dall-e-3/	An AI model that generates images from text descriptions.
ELAI	https://elai.io/	An AI-based text-to-video tool.
Gamma	https://gamma.app/	Helps in creating visual presentations.
Napkin	https://www.napkin.ai/	It helps with visual note-taking and creating infographics.
Scribe	https://scribehq.com/	It helps you create visual guides and tutorials.
Stabil diffusion	https://ai-pro.org/	An AI-based image generation tool.
Vyond	https://www.vyond.com/plan	An artificial intelligence-based video creation

		platform that creates editable videos in multiple styles with simple commands.
AI detectors		
GPTZero	https://gptzero.me/	Recognizes AI-generated text to help identify potential ethical violations
ZeroGPT	https://www.zerogpt.com/	Recognizes text generated by artificial intelligence to help identify ethical violations.
